

Nanotech

Middle East 2017

Conference and Exhibition
4 - 6 December, 2017

Dubai International Convention
and Exhibition Centre, Dubai - UAE

Organized by

www.setcor.org

www.chem.org.sa

www.gulfchemists.org

The largest Nanotechnology event for the Middle East, Gulf Region, North Africa, Africa and South Asia region

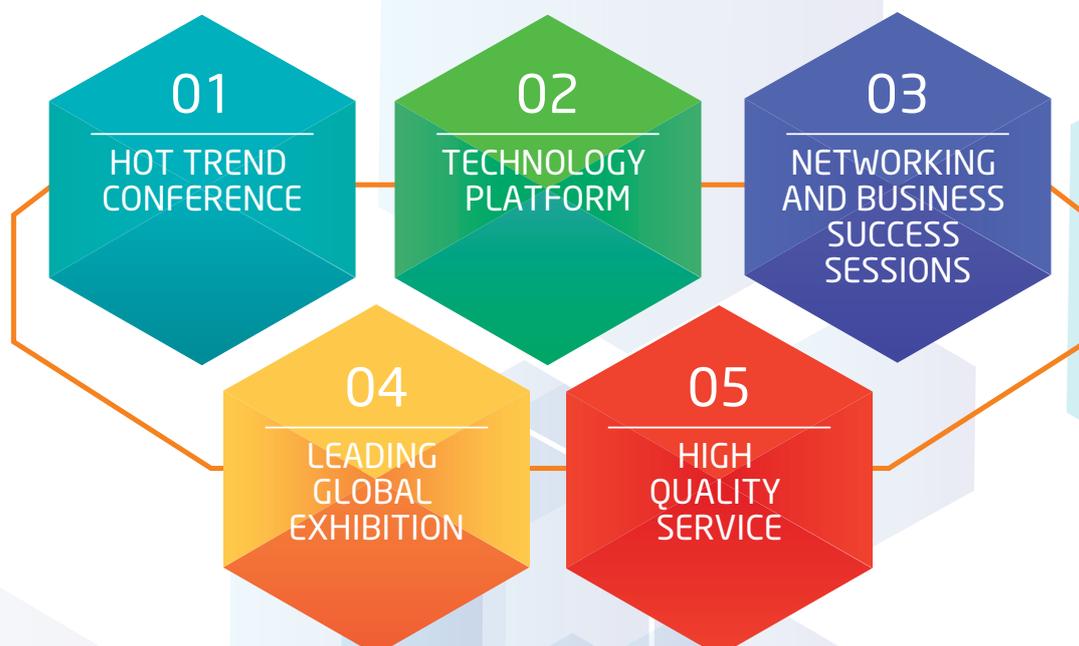

Nanotechnology and Nanoscience are the next generation and the high-value future technologies that overcome the limitations of the existing technologies and enrich our lives through the convergence of various industries such as IT, BT, ET, etc. They are a priority field for today's innovation leaders.

The Nanotech Middle East Conference and Exhibition (Previously Nanotech Dubai) remains the main and most dedicated and commercially-focused Nanotechnology and Nanoscience conference and exhibition in the Middle East, Gulf Region, North Africa, Africa and South Asia region offering scientists, technology developers, business leaders, including senior executives of leading nanotech companies, business development teams from large and mid-size companies, investors and other industry experts, a unique opportunity to identify new technology trends, development tools, product opportunities, R&D collaborations, and commercialization partners.

The combination of international conference, industry and business sessions/workshops, networking sessions and the parallel international exhibition will offer a unique opportunity for all stakeholders to bond over common interests and forge new commercial partnerships for the future.

Nanotech Middle East 2017 is co-located with the Surtech Middle East 2017 and Biotech Middle East 2017. Each of the events is full a three days conferences, co-located with a common exhibition. We co-locate these events because there is strong overlap across these topics, exposing you to the full relevant supply chains and customer and supplier bases, saving you time and money from attending separate events.

The Nanotech Middle East focus on the followings components

Hot trend conference

The Nanotech Middle East 2017 conference is an opportunity to understand the latest nanotechnology and nanoscience research outcomes. This year edition selects the nanotechnology for energy, environment protection, water technologies and building and construction as its key themes and above 300 highly ranked experts' presentations are planned. The conference oral and poster sessions will provide an opportunity to discuss and exchange opinions on the current state and future developments in this promising area. The conference is not limited to a conventional presentation of ideas or results, but seeks to deepen the common themes among the participants and serving as a link between industry and researchers.

The Nanotech Middle East 2017 conference main sessions include:

01	Nanotech for Water Technologies	05	Nanotech for buildings and construction
02	Nanotech for Oil and Gas	06	Nanotech for life sciences
03	Nanotech for Energy	07	Nanomaterials Processing/ Nanometrology
04	Nanotech for environment protection and remediation	08	Nanoelectronics/Phononics

In parallel to the above conference main sessions, many focused sessions and workshops are planned. These sessions target new research and promising nanotechnology related topics in order to exchange information on specific research areas and solve particular technological problems. They are organized/chaired by highly ranked researchers from all around the world and involving international and local societies, foundations and research Institutions as partners.

Technology Platform

Nanotech Middle East is an international exchange event leading the nano-based future convergence technology. It's an international cooperation platform in which core technology and its applied products in future new industries, such as artificial intelligence, robotics, Internet of Things, smart/autonomous vehicles, 3D printing, IoT, etc., including the existing key industries, such as semiconductor, display, mobile, etc., are effectively exchanged. It's a unique platform for discussions and networking between scientists, industrials, policy makers, key decision makers and investors.

Nanotech Middle East offers a perfect opportunity for those looking to explore the latest technology solutions and innovations. As industrials, Nanotech Middle East will help you to secure core competitiveness for future technology industry innovation and keep you also updated about the new technologies and products available in the market.

Networking and Business Success Sessions

Nanotech Middle East 2017 will be an excellent opportunity for business networking and success. It will create an optimal business environment by operating a business program that serves various purposes, such as product and technology trade, joint R & D, investment attraction etc., as well as by inviting domestic and foreign suppliers and buyers.

These sessions objectives are to

- ▶ Showcase developments in nanotechnology for applications in “traditional” sectors like Energy, Transport and Medicine and in new and “promising” new sectors and discuss the most recent advances in technology developments and business opportunities.
- ▶ Bring together nanomaterials producers and developers with end-users to address the needs of industry and meet potential clients.
- ▶ Share new project ideas and identify partners for collaborative R&D and industrial projects.

These sessions will offer you the opportunity to find and meet the right people. We invite you then to join us and attend these business sessions as an opportunity for substantive business outcomes.

Leading Global Exhibition

Nanotech Middle East is aiming to quickly become a leading international exhibition in the nanotechnology field. Also, the event provides an opportunity for substantive interchange and business outcomes in the nanotechnology field. The three days events represent a unique venue for companies to promote products, equipment and technologies. It creates a big marketplace for nanotechnology products and applications. Moreover, it aims to reach a high level of satisfaction and response from its participants and visitors as you are the key to the success of Nanotech Middle East 2017 and future editions.

The exhibition options

Nanotech Middle East 2017 Exhibitors can choose one of the following Exhibition options (*):

Booth Space Including Shell Scheme

9 or 12 sqm space booth
Multiple booths can be booked
USD 520 per sqm

Booth Space only

Minimum space of 15 sqm, floor only.
Multiple of 15 sqm space can be booked
USD 480 per sqm

* Please review the exhibition terms and conditions

Booth Shell Scheme

The booth Shell Scheme will have the below details

QTY	DESCRIPTION
9 or 12 m2	Exhibition space carpet
9 or 12 m2	Free standing octanorm structure with white infill panels (2 sided walls for corner booth and 3 sided walls for aisle booths)
1 lot	White fascia board displaying exhibitor name and stand no. (English) in computer cut vinyl sticker
1 no.	White round table
2 no.	White chairs
1 no.	System reception counter
1 no.	Waste Paper basket
3 no.	Spotlights
1 no.	Single socket

High Quality Service

Nanotech Middle East 2017 will provide a variety of differentiated services. Nanotech Middle East 2017 supports exhibiting businesses by providing a variety of programs and benefits from exhibition preparations to field activities such as business matchmaking, coordination, etc.

We hope that you will be able to use Nanotech Middle East more efficiently and effectively through the high-quality services that Nanotech Middle East provides.

INTERESTING SPONSORSHIP OPPORTUNITIES

Nanotech Middle East 2017 offers interesting Sponsorship Packages (Gold, Silver and Bronze) and other specific sponsorship including printings, online and offline advertising options. The details are available under the event web site www.nanotechme.com.

BUSINESS MATCHING SYSTEM

An online meeting booking system that Exhibitors can access and use to search for partnership opportunities, invite a specific visitor, and schedule an on-site meeting. The system is provided to the exhibitors free of charges.

EXCLUSIVE COORDINATOR

Nanotech Middle East 2017 will provide one-stop services from exhibition preparation to field operation by designating an exclusive coordinator for each Exhibitor so that they can operate their exhibition without problems as well as improve its satisfaction level.
